PERSONAL EMERGENCY RESPONSE SYSTEM

NO LAND LINE NEEDED!

Guardian's Cellular Personal Emergency Response System (PERS) is a medical alarm that can preserve the independence of seniors while offering an immediate response in the first critical moments of an emergency with hands-free, two-way communication over a GSM cellular network.

With many seniors cancelling their traditional phone line, we recognized the need for them to get help through Guardian using cellular technology. With the simple push of a button, a caring, well-trained Care Representative will immediately answer the call and stay on the phone until help arrives, whether ambulance, family member, friend or neighbor.

The system operates for up to 24 hours with a rechargeable back-up battery in the event of a power failure and sends warning signals for a low battery. Caregivers are notified of emergency alerts, and alert activity reports are available to help keep health care providers informed.

Guardian PERS includes:

- Hands free, two-way voice communication only seconds after pendant is activated.
- Both visual and audible alarm indicators, which are perfect for both hearing and visually impaired subscribers.
- Rechargeable backup battery and warning signals for low battery and electrical AC power failure.
- Lightweight, water resistant button on pendant or wristband.
- Friendly, caring, well trained professionals providing outstanding service.
- GSM cellular connectivity eliminating the need for traditional land line phone.
