Medication Dispenser

Guardian's medication dispenser eases the stress of complex prescription regimens in a management system that simplifies the process. The unit is easy to operate and cost-effective, enabling seniors to take their medicine on schedule to promote optimal health.

The dispenser organizes medicines and provides reminders for each dose, using a clear automated voice, messages on a display screen and flashing lights. If a dose is missed, the system triggers a phone call to alert a family member or caregiver.

To assure safety, the unit's locking storage compartment limits access to one dose of pills at a time and can hold a supply of up to 40 days of medication. The unit uses a rechargeable back-up battery in the event of a power failure.

Guardian Medication Dispenser includes:

- A friendly clear voice, text message and flashing light that announce when medication is due.
- Caregiver notification of a missed dose.
- Medication cups can hold 20 - 25 pills and supplements.
- Holds up to 60 medication cups.
- Dispensing button designed for senior's special needs - easy to see and feel.
- Battery backup system in case of power failure.
- Locking storage compartment for extra security.
