# PERSONAL EMERGENCY RESPONSE SYSTEM

The Guardian Personal Emergency Response System (PERS) is a medical alarm that offers immediate response in the first critical moments of an emergency with hands-free, two-way communication.

By wearing a water resistant pendant as a necklace or a wristband, help is simply a push of the button away! When you are in need of assistance, simply press your button and a caring, well-trained Care Representative will talk with you through a speaker box connected to your telephone line. Most importantly, the Care Representative will call for appropriate help – family, friend, or ambulance – and stay in communication with you until help arrives.

The system operates for up to 24 hours with a rechargeable back-up battery in the event of a power failure. The Guardian system will work throughout your home and outside around the perimeter of your home.

No matter the need – personal emergency, fire, burglary – Guardian Medical Monitoring will be there for you 24 hours a day / seven days a week!

### Guardian PERS includes:

- Hands free, two-way voice communication only seconds after pendant is activated, with built-in speakerphone.
- Both visual and audible alarm indicators, which are perfect for both hearing and visually impaired subscribers.
- Rechargeable backup battery and warning signals for low battery and electrical AC power failure.
- Lightweight, water resistant button on necklace or wristband.
- Friendly, caring, well trained professionals providing outstanding service.
